For Online Participation

Kindly confirm your In-person participation at DELNET, New Delhi through email.

Dr. Sangeeta Kaul
Director, DELNET, New Delhi
Email : sangs@gmail.com
Mobile : +91 9810329992

Dr. Nabi Hasan
Head Librarian, IIT Delhi
Email : hasan@library.iitd.ac.in
Mobile : +91 9560978667

Registration 9:30 a.m.
Tea 10:00 a.m.

- The certificate of participation will be provided to all attendees
- There is no participation fee
- Kindly join us for lunch after the programme

Workshop Coverage & Resourse Person

Workshop Coverage

- What is Elicit, and how is it different from general AI tools like ChatGPT
- Semantic Search in Elicit - without exact keyword matches
- Automated Literature Review using Elicit Reports
- Structured Data Extraction across multiple papers simultaneously
- Topic Finder & research question brainstorming
- Integration with Zotero and citation export
- Ethical use and academic integrity considerations

In-person Participants are encouraged to bring their laptops and create a free Elicit account at http://elicit.com before the session for a hands-on experience.

Resource Person -

Mr. Satbir Chauhan

Mr. Satbir Chauhan brings together the precision of a computer scientist and the vision of a library innovator. Holding a Bachelor's degree in Computer Science Engineering and a Master's in Library Science, he has spent over five years redefining what modern library services can look like.

At IIT Delhi, he is currently focused on maximising the capabilities of the ERM system by building a dynamic e-resources analytics dashboard, and bringing innovative solutions to strengthen the library's research support ecosystem. He is actively exploring AI-driven library applications, including Retrieval-Augmented Generation (RAG), knowledge retrieval systems, and intelligent discovery interfaces. His expertise in digital library infrastructure spans the integration and migration of Library Management Systems (LMS) across cloud environments, including AWS, Google Cloud Platform (GCP), Microsoft Azure, and Baadal. He is a strong proponent of open-source solutions and their potential to future-proof library ecosystems.

Driven by a vision where technology and librarianship converge, Mr. Chauhan is committed to making libraries more sustainable, accessible and future-ready.

Prior to joining IIT Delhi, he worked with HDFC Library, Ashoka University, where he contributed to impactful initiatives in library automation, digital repositories, and research support services. Notable among these are the development of the Ashoka Knowledge Repository using DSpace 8, the design of a Digital Research Support System, and improvements to Koha-based book discovery.
